

ITS Connect: Integrated Payments

INTEGRATE ALL YOUR CARD PAYMENTS

Accept credit, debit and purchasing cards efficiently with a fully integrated multi-channel, multi-acquirer solution.

Accept card payments on your website or face to face in store and link with full line item detail.

Highlights

- Take payments from your call centre, website & in-store points of sale
- Accept Visa, MasterCard and American Express purchasing cards
- Seamlessly integrated with your existing order processing system
- Minimise your PCI DSS obligations with our secure lodged card functionality

Tailored to your business

Ideal for merchants looking to process high volumes of transactions, some of which require complex addendum data, ITS Connect: Integrated Payments captures invoice information directly from your system, generates the accompanying payment request and returns an electronic response. Our flexible system matches your business process and enables payment at point of despatch as well as at point of order.

Face to face transactions

Profit from the security of chip and pin at your trade counters whilst providing full addendum data to your customers. [Watch our video](#) to see how buyers and suppliers can benefit from purchasing cards.

Secure card storage

Our lodged card functionality means you no longer risk storing card numbers on your systems. Card details are lodged once and all subsequent transactions are carried out simply by quoting a reference.

The E-Statements service enables you to view all your recent transactions on demand. Create and download reports by a range of criteria and analyse all your submissions for easy reconciliation.

Expert integration consultancy

Implementation is straightforward using our simple XML API. Our team of payment experts provide full integration consultancy supported by comprehensive documentation.

“Integrated Payments helped us win new business worth £10 million.”

Michelle White, Director, Pertemps Recruitment

Supplier benefits

Win more business

- Supply the Level 3 invoice data your purchasing card customers need
- Accept all major debit and credit cards plus purchasing cards
- Take payments face to face, online, via mail order or over the telephone

Simplify compliance

- Tokenisation ensures all lodged card numbers are stored securely
- 128-bit SSL encryption enables safe data transfer
- PCI DSS-certified payment service provider

Save time

- Continue using Integrated Payments if you move banks
- Seamless integration with your existing order processing systems

Cardholding organisation benefits

Maximise efficiency savings

- Receive the electronic invoice data essential for effective spend analysis across your business
- Pay your suppliers quickly and easily via a purchasing card
- Reduce maverick spend and keep card numbers secure by lodging cards with preferred suppliers

Faster purchasing

- Speed the purchasing process by empowering employees to purchase directly from preferred suppliers on the internet, in store or over the telephone

The ITS difference

ITS is the leading supplier of purchasing card software in the UK. For over 20 years we have been developing innovative payment solutions. As an independent payment service provider we work with all the leading UK and French banks and all the major card schemes.

We are committed to maintaining the highest levels of data security and are a PCI DSS-certified payment service provider.
