

ITS Connect: Virtual Terminal

THE SIMPLEST WAY TO WIN PURCHASING CARD BUSINESS

Accept credit, debit and purchasing card payments for mail or telephone orders anywhere with internet access.

Simply enter card details from any internet connection for real-time authorisation, ensuring funds are available.

Simple set up

ITS Connect: Virtual Terminal is a highly secure online method of authorising, processing and submitting your debit, credit and purchasing card transactions to your acquiring bank. Quick and easy to implement, the system requires no integration or technical expertise to set up.

Access anywhere

Simply log on to Virtual Terminal via any computer with a web connection. Enter your unique password then key in the transaction details. Your payment is immediately authorised, confirming that funds are available.

Take payments within days

Virtual Terminal is used by businesses of all sizes to accept low volumes of debit, credit and purchasing card transactions. All you need to start taking payments is a merchant bank account and a computer with internet access.

Highlights

- Accept Visa, MasterCard and American Express purchasing cards (Level 3)
- Accept all major debit and credit cards for mail or telephone orders
- No technical integration required, just log in from any internet connection
- Minimise your PCI DSS obligations with our secure lodged card functionality

Secure card storage

Our lodged card functionality means you no longer risk storing card numbers on your premises. Card details are lodged once and all subsequent transactions are carried out simply by quoting a reference.

The Transaction Manager function enables you to view all your recent transactions on-demand. Create and download reports by a range of criteria including transaction type, card type, transaction value and date.

Virtual Terminal also captures valuable addendum data and passes this to your customer electronically. This Level 3 transaction information includes the essential HMRC-approved commodity codes and VAT information that your customer needs to manage their spending.

Purchasing card benefits

[Watch our video](#) to see how buyers and suppliers can benefit from purchasing cards.

Supplier benefits

Win more business

- Supply the Level 3 invoice data your purchasing card customers need
- Accept all major debit and credit cards plus purchasing cards

Simplify compliance

- Tokenisation ensures all lodged card numbers are stored securely
- 128-bit SSL encryption enables safe data transfer
- PCI DSS-certified payment service provider

Save time

- Upload all your product codes on set up
- Access full online reporting on-demand via Transaction Manager

Cardholding organisation benefits

Maximise efficiency savings

- Receive the electronic invoice data essential for effective spend analysis across your business
- Pay your suppliers quickly and easily via a purchasing card
- Reduce maverick spend and keep card numbers secure by lodging cards with preferred suppliers

Faster purchasing

- Speed the purchasing process by empowering employees to purchase directly from preferred suppliers over the telephone simply by quoting a reference

The ITS difference

ITS is the leading supplier of purchasing card software in the UK. For over 20 years we have been developing innovative payment solutions. As an independent payment service provider we work with all the leading UK and French banks and all the major card schemes.

We are committed to maintaining the highest levels of data security and are a PCI DSS-certified payment service provider.
